

## **The Red Willow Advantage:**

- Decades of Viticultural Mastery. Partner with a team possessing the immense experience that pioneered the Yakima Valley. We don't just grow grapes; we manage the nuances of every vintage with seasoned intuition.
- Instant brand equity: Fruit contracts include the right to use the "Red Willow Vineyard" name on labels.
- Marketing advantage including access to photography, web site, social media following.
- Scarce & Exclusive: We are isolated with unique soil formations and the acreage is limited. Securing a contract here means joining a small, elite group of winemakers with access to some of the most storied fruit in the Pacific Northwest.
- Data-driven collaboration: We are happy to assist winemakers at harvest with Brix & pH numbers, often saving trips out.
- Cold room storage. Immediately after the fruit is harvested it is weighed then stored in a refrigerated room until pickup.
- Row designates. Each winery knows exactly which rows are theirs.
- Each year a number of wineries choose to bring wine-club members out for a vineyard tour. Often the focal point of media or industry tours.
- Mike Sauer, need I say more?
